DESIGN MEETS RESPONSIBILITY

At Displine, we think ahead
- beyond good design.
Sustainability is a central principle
for us that characterises our decisions
and processes from start to finish.

We rely on high-quality aluminium
from Germany, which can be melted
down and reused - without any loss of quality.
This saves energy and reduces waste.

We manufacture our products regionally
in Poland, which not only ensures fair
production conditions, but also shortens
transport routes and reduces emissions.

We also think sustainably when it comes
to packaging: we use recycled paper
instead of plastic to minimise our impact
on the environment.

Good design starts with the idea
and does not end with responsibility.

WHEN IDEAS TAKE SHAPE

Behind every Displine product stand creative minds with a keen sense of aesthetics, materials and function. Our designers base on an artful combination of clear forms and well thought-out details to create products that elevate the interiors. Their designs are the result of a passion for good design and a deep understanding of modern living culture.

His designs combine functionality, simplicity and elegance.

FABIAN BAUMANN
